

A Hilarious Trio Game

Game objective:

Completing the face trios through pantomime – using facial expressions and hand movements.

Instructions:

- First and important rule! No talking during the game, but you can laugh all you want.
- Shuffle the game cards.
- Deal 4 cards to each player and place the rest in the middle as a draw pile.
- Set the playing order.
- Each player, in turn, must ask for a card from another player selected by pointing in his direction.
- The player requests the faces missing from his trio by mimicking the required face.
- If the player has the requested card, he gives it to the player who requested it. The player who received the card is entitled to another turn.
- If the player does not have the requested card, he makes a sad face and the player who requested it must draw a card from the draw pile. The turn goes on to the next player.
- The player holding all three cards comprising the trio must put them aside, face up.
- If a player is left with no cards, he must draw from the draw pile.
- If there are no more game cards, the game is continued until all trios are complete.
- The winner is the player holding the most trios.

A fun game :)
